DESIGNATION	SOURCE	DURATION	ID
44:18 - 44:23	Schonfeld, Dan 2023-02-03	00:00:20	SD-4418.1
44:18	Q. Dr. Schonfeld, I want to circle back to		
44:19	your understanding of standalone mode.		
44:20	If a player is paused, so if the audio is		
44:21	paused on a player, is that player operating in		
44:22	standalone mode in which it is configured to output		
44:23	audio individually?		
44:25 - 45:05	Schonfeld, Dan 2023-02-03	00:00:27	SD-4418.2
44:25	THE WITNESS: So I would have to know the		
45:01	context of such a hypothetical situation. I'm not		
45:02	sure exactly what you mean by "paused."		
45:03	My view in general is that to operate in		
45:04	standalone mode, you actually have to be playing		
45:05	audio individually.		
45:06 - 45:12	Schonfeld, Dan 2023-02-03	00:00:33	SD-4418.3
45:06	And I would say that if you were paused, I		
45:07	would probably not consider it to be operating in		
45:08	standalone mode. The only thing I would say is that		
45:09	it is possible such a situation could arise, I		
45:10	just -- I don't have enough information about such a		
45:11	hypothetical. So I wouldn't be able to answer it in		
45:12	the abstract.

Sonos Affirmatives	00:00:09
TOTAL RUN TIME	00:00:09

SD-4912

DESIGNATION	SOURCE	DURATION	ID
49:12 - 49:13	Schonfeld, Dan 2022-08-31	00:00:07	SD-4912.1
49:12	Q. In order to meet the standalone mode,		
49:13	does the zone player have to be playing audio?		
49:15 - 49:16	Schonfeld, Dan 2022-08-31	00:00:02	SD-4912.2
49:15	THE DEPONENT: That's not my		
49:16	understanding.

Sonos Affirmatives	00:00:20
TOTAL RUN TIME	00:00:20

SD-5104

DESIGNATION	SOURCE	DURATION	ID
51:04 - 51:08	Schonfeld, Dan 2022-08-31	00:00:20	SD-5104.1
51:04	Q. What does it mean for a player to be		
51:05	configured to play back audio individually?		
51:06	A. That it is not configured to play as part		
51:07	of the group, which is precisely what the		
51:08	non-infringing alternative contemplates.

174:22	prior art system, that zone group is activated for		
174:23	synchronous playback at the time of creation,		
174:24	correct?		
174:25	A. That's my understanding.

DESIGNATION	SOURCE	DURATION	ID
175:01 - 175:05	Schonfeld, Dan 2022-08-31 175:01 Q. And so the zone group is not predefined 175:02 in advance of being invoked or activated, correct? 175:03 A. In advance of what? I missed the bottom 175:04 part. 175:05 Q. In advance of being invoked or activated.	00:00:07	SD-17501.1
175:07 - 175:10	Schonfeld, Dan 2022-08-31 175:07 THE DEPONENT: The -- the formation of 175:08 the group and the invocation and the selection and 175:09 the invo- -- and the invocation are contemporaneous 175:10 based on the prior art system.	00:00:22	SD-17501.2

DESIGNATION	SOURCE	DURATION	ID
185:17 - 186:10	Schonfeld, Dan 2022-08-31	00:01:19	SD-18517.1
185:17	Q. (By Mr. Smith) Yeah, but again --		
185:18	just -- just focusing on the actual operation of		
185:19	Sonos prior art system, whether it's a normal zone		
185:20	group or a Party Mode, regardless, the indication		
185:21	is not received before the zone scene is selected		
185:22	for invocation, correct?		
185:23	A. That is -- that is correct for Party		
185:24	Mode. It's a little different in the sense that		
185:25	each indication comes with the invocation, and so		
186:01	you have multiple indications and multiple		
186:02	invocations where this -- and so, in that respect,		
186:03	for -- for the given -- a given SetAVTransportURI		
186:04	SOAP message for Party Mode, it does not arrive		
186:05	before the indication. But there are potentially		
186:06	prior such SetAVTransportURI SOAP action messages		
186:07	that have been received because of prior		
186:08	invocations of Party Mode. So to the extent		
186:09	that -- that you've viewed those as indications as		
186:10	well, those would be received prior.

216:12 - 217:02	Schonfeld, Dan 2022-08-31	00:00:58	SD-21612.1
216:12	Q. (By Mr. Smith) And you're aware that		
216:13	none of the Squeezebox devices have firmware that		
216:14	was released prior to the priority date for the		
216:15	'885 patent, correct?		
216:16	A. I am aware, but I realize that the		
216:17	operation was no different from the earlier		
216:18	Squeezeboxes that I was un- -- unable to obtain,		
216:19	and the operation is consistent with the		
216:20	SoftSqueeze software that -- that was -- that did		
216:21	predate the -- that -- the critical date in this		
216:22	case, and, therefore, I agree that they -- the		
216:23	Squeezeboxes themselves are after the -- are after		
216:24	the critical date but not necessarily the -- but		
216:25	their operation reflects exactly what was happening		
217:01	in the earlier Squeezeboxes that would have been		
217:02	available prior to that date.

DESIGNATION	SOURCE	DURATION	ID
226:21 - 226:25	Schonfeld, Dan 2022-08-31 226:21 Q. You agree, though, that there's no 226:22 message that's sent from one of the Squeezebox 226:23 players to the other Squeezebox players that gets 226:24 routed through the server, correct? 226:25 A. Well, the server --	00:00:10	SD-22621.1
227:02 - 227:06	Schonfeld, Dan 2022-08-31 227:02 THE DEPONENT: So the server is not a 227:03 router. So by virtue of the fact that it's not a 227:04 router, nothing gets routed through it. So I agree 227:05 that it's not a router and, therefore, nothing gets 227:06 routed through.	00:00:13	SD-22621.2
